## Summary

---

Aspiring AI/ML Engineer with experience building end-to-end AI-powered data analytics applications using Python, FastAPI, and Streamlit. Developed a production-style platform that automates data preprocessing, exploratory data analysis (EDA), machine learning workflows, and Retrieval-Augmented Generation (RAG) for natural language interaction with datasets. Skilled in machine learning, LLM integration, backend development, and designing scalable AI systems.

## Technical Skills

---

|                                |                                                                                                |
|--------------------------------|------------------------------------------------------------------------------------------------|
| <b>Languages:</b>              | Python, C++, C, SQL                                                                            |
| <b>ML &amp; Data Analysis:</b> | Exploratory Data Analysis (EDA), Feature Engineering, Scikit-learn, Pandas, NumPy              |
| <b>Deep Learning &amp; AI:</b> | CNNs, RNNs, TensorFlow, PyTorch, NLP, LLM Fine-tuning                                          |
| <b>LLM &amp; RAG:</b>          | LLM Integration (Groq / Llama 3), Retrieval-Augmented Generation, FAISS, Sentence-Transformers |
| <b>Backend &amp; Frontend:</b> | FastAPI, Streamlit, Flask                                                                      |
| <b>Visualization:</b>          | Matplotlib, Seaborn, Plotly                                                                    |
| <b>Tools &amp; Cloud:</b>      | Git, GitHub, Jupyter Notebook, VS Code, MySQL, Google Colab, AWS (S3, EC2)                     |

## Projects

---

### AI Business Analyst – Full-Stack AI Data Analysis Platform

[github.com/winnermarvi/AUTO-DATA-STORYTELLER](https://github.com/winnermarvi/AUTO-DATA-STORYTELLER) | [Demo Video](#)

- Developed an AI-powered data analytics platform using FastAPI and Streamlit that automates dataset upload, preprocessing, exploratory data analysis (EDA), and machine learning model evaluation.
- Implemented Retrieval-Augmented Generation (RAG) using FAISS and Sentence-Transformers to enable context-aware chat over generated analysis and reports.
- Built a natural language analytics module that interprets user queries and performs dynamic Pandas-based data analysis with interactive visualizations.
- Integrated Llama 3 via Groq API to generate business insights, executive summaries, and automated PDF reports from analysis results.
- *Technologies:* Python, FastAPI, Streamlit, Pandas, NumPy, Scikit-learn, FAISS, Sentence-Transformers, Groq (Llama 3), Plotly, ReportLab

### Custom Machine Learning Optimizer

- Designed and implemented a custom gradient-based optimization algorithm and benchmarked its convergence behavior against the Adam optimizer.
- *Tools:* Python, TensorFlow/PyTorch, NumPy, Matplotlib, Google Colab

## Education

---

### St. Francis Institute of Technology

Sept 2023 – May 2027 (Expected)

*B.Tech, Computer Engineering*

- **Relevant Coursework:** Data Structures, Database Management Systems, Machine Learning, Artificial Intelligence, Computer Architecture, Computational Theory

## Certifications

---

- Google Data Analytics Professional Certificate
